INTRODUCTION

A results-driven Full-Stack Web Developer with hands-on industry experience in frontend development, specializing in building scalable and high-performance applications using modern web technologies. Proficient in crafting efficient state management systems for complex user interfaces and delivering seamless, user-centric experiences. Experienced in implementing real-time features and integrating AI-driven functionalities into applications. Strong focus on responsive design, performance optimization, and maintainable architecture, while actively expanding backend expertise to build end-to-end solutions.

EDUCATION

Sant Longowal Institute of Engineering and Technology

Bachelor of Engineering in Electrical Engineering

Sangrur, Punjab

Aug. 2021 – May 2025

Jagdish Nandan College

Intermediate in Science

Madhubani, Bihar

Aug. 2018 – Mar 2020

EXPERIENCE

Software Engineer Intern

Antier Solutions

August 2025 – Present

Mohali, Punjab, India

Solos Digital Banker

- **Tools:** React Native, Redux Saga, Redux Toolkit, Ethers.js, Socket.io, Passkeys, React Navigation.
- Built a cross-platform fintech/Web3 app for secure digital banking, asset vaulting, and real-time tracking.
- Implemented scalable state management and async workflows using Redux-Saga.
- Integrated blockchain interactions (wallets, smart contracts) via Ethers.js.
- Enabled real-time updates using Socket.io for balances and notifications.
- Developed secure authentication with Passkeys and biometric verification.

The RED NFT Marketplace

- **Tools:** Next.js 16+, React 19, TanStack Query, Stripe, Sumsb KYC, Socket.io, Recharts, Crypto JS, NextAuth.js.
- Built a multi-platform NFT ecosystem (Investor, Admin, Affiliate) for asset tokenization.
- Developed admin dashboard with real-time analytics using Recharts.
- Integrated Stripe + Sumsb for KYC/AML and global payment workflows.
- Implemented real-time notifications and secure API communication (AES-256 encryption).
- Designed affiliate system with referral tracking and automated payouts.

PROJECTS

Collaborative Google Docs Clone

[Repo Link](#) | [Live Link](#)

- **Tools:** Next.js, TipTap, Convex, Liveblocks, Tailwind CSS, Shadcn UI, Clerk Auth, Vercel.
- Built a full-featured Google Docs alternative supporting real-time collaborative editing with rich formatting tools.
- Integrated TipTap editor with custom extensions (font size, line height, margin ruler) to deliver a polished writing experience.
- Enabled live cursor tracking, comments, mentions, and document syncing via Liveblocks and Convex.
- Designed multi-tenant organization workspaces with role-based access and dynamic document templates.
- Implemented Clerk for seamless authentication, and deployed the production-ready app on Vercel.

TECHNICAL SKILLS

Languages: JavaScript, SQL (PostgreSQL), C/C++ (Basic)

Frontend: React, Next.js, HTML5, CSS3, Material-UI

Backend: Node.js, REST APIs, Authentication (JWT, Sessions)

Tools & Platforms: Git, VS Code, Jupyter Notebook, Linux, Docker

Core Concepts: Data Structures & Algorithms (Learning), OOP, REST Architecture, Basic System Design
